

QUENTON ALEXANDER DUGAN

OBJECTIVE I wish to be a game coder. I want to program games. A dream job would to be a game designer for Ubisoft game company. I am very good at public speaking and presentation but I don't think I would want to make it a career. Ubisoft would be what I want as my Objective.

SKILLS & ABILITIES Completed level one of AutoCAD, certificate. I am slightly advanced in Adobe illustrator as well. Currently in progress of learning java script. I am a business entrepreneur. I have made several businesses. I made my own bakery service and still take orders till this day. I have also made a lawn and house service business where I help with any house or lawn work. All businesses are still up and running when work is requested or any baking needs. I built my own bake in 2011 to 2012. I am very well interested in learning a lot about computers.

EXPERIENCE **HUDSON ST DESIGN**
Jan 1, 2014-present
My job is to do any of the trash work and organizing. I have put together some sets and have put them out on the viewing floor. My first job was to completely re organize the garage. This was a 12 hour job and it is now a walk in garage and the manager is very happy with my work.

EDUCATION **CURRENT- NEW TECHNOLOGY HIGH SCHOOL**
I have had three high schools so far. First in 9th grade I went to Sonoma High School. I had honors English for my ninth grade year. Then I switch to an online charter school where in one class I took a computer science class. Then for the second semester of tenth grade I switched to New Technology High School. The current year I am in (Junior) I have my basic classes. I am also taking a Digital media class. I am learning Adobe illustrator for the past year. I am also part of a session class where I am learning how to code. Java script specifically.

COMMUNICATION I work very well In groups. I bring a lot of creativity to the table. A lot of the projects we do in my school are project based learning. Meaning that teach the class using projects. One of the end products of project based learning is that we have to bring on a presentation. Whenever I think of presentation I don't think of PowerPoint or Prezi. Most of my presentations are very live like using entertainment to produce information

LEADERSHIP

I am not a leader of any groups or charities. I have been part of quite a few volunteer opportunities. I went to a summer camp in 2008 and the manager of the establishment said she liked how interested I was in all the work and the camp I was in. she offered me to be a volunteer at the Sonoma Academy of Dance and Arts. This was the establishment that held the camp I went to. She asked me to help out around the place and she let me take some dance classes for helping out. In sixth grade I volunteered to help out with Sassariini Elementary school for one of their school fairs.
